GÉANT

connect • communicate • collaborate

By acting as the underlying network layer necessary to harness the power of grid computing, GÉANT is enabling scientists and musicians to access the extreme computing power needed to recreate ancient instruments, and bring their sound back to life for the enjoyment of modern society.

Recreating ancient instruments

GÉANT is the high-performance pan-European communications infrastructure dedicated to the research and education community. Together with Europe's national research networks, GÉANT connects 40 million users in over 8,000 institutions across 40 countries.
